GENERAL SCOPE

The Ninth National Conference on Chemistry is organized under the motto 'science and technology for better life'. The main objective of the conference is to discuss all fields of chemistry related to innovative and current topics, with emphasis on the latest developments in chemistry and relation to everyday life and clean environment. Multidisciplinary topics with related fields such as theoretical chemistry, chemical engineering, physics, earth and life sciences will be strongly encouraged. High-level scientific contributions including basic research and industrial applications will be particularly appreciated. Innovations in the chemicals sector will be supported that lead to the development of advanced materials (such as hybrid and lightweight materials, materials for tissue engineering, self-cleaning surfaces, and energy recovery and storage), and advanced process technologies that enable more flexible production with more efficient use of energy, feedstock, and water. Contributions to improved recycling and increased use of renewable feedstock will also be considered. Papers on the following topics are invited: agrochemistry – fertilisers and pesticides; analytical chemistry; catalysis; ceramics and silicate chemistry; chemical engineering; chemistry and education; chemistry and technology of polymers; computational chemistry and molecular modelling; electrochemistry; environmental protection; food chemistry, green energy, inorganic chemistry; management in chemical industries; mineral processing; natural products; new materials; organic chemistry; organometallics chemistry; petrochemistry; pharmaceuticals; physical chemistry; pulp and paper technology; radiochemistry; solid state chemistry; supramolecular chemistry; textile and leather chemistry.

SCIENTIFIC PROGRAMME

The programme of the conference will consist of invited plenary (40 min) and keynote (30 min) lectures, oral presentations (15 min), and posters. Flash oral presentations (5 min) of students' posters are optional. All the presentations should be related to recent and innovative studies. Keynote lectures and oral presentations will be organized in parallel sessions. Posters will be presented within 2-h poster sessions. Poster presentation sizes should be a maximum of 90 cm high by 70 cm wide.

CONTRIBUTIONS

Selection of oral and poster presentations will be based on half-page abstracts. New methods, approaches, and applications will be encouraged. Contributions should comply with the scope of the conference. Submissions should be made online using the application form available on the website: <http://9ncc.unionchem.org>. The reviewing process will be carried out online via the internet. After evaluation of the contributions, the programme will be made available on the conference website. Selected full-text papers of conference contributions will be published in a special issue of the journal Bulgarian Chemical Communications (<http://bcc.bas.bg>).
